1 January 2026 to 30 June 2026	0.00%	12.50%

*To 30 April 2025

Frequently asked questions

What is a smoothed bonus portfolio?

A smoothed bonus portfolio is an investment that uses smoothing mechanisms to reduce short-term market volatility, while aiming for long-term inflation-beating returns. Your money is pooled with other policyholders' money and the returns to policyholders are 'evened' out, or smoothed, over a number of years. This means that the bonuses paid in one year may be higher or lower than the actual returns in the stock market. For further information, please refer to the Principles and Practices of Financial Management available on the [Metropolitan website](#).

What is the difference between vested and non-vested bonuses?

Vested

The vested bonus is added to the client's investment and will not be taken away unless all or part of the policy is surrendered. The vested bonus will, however, not be reduced or removed when the investment matures or the client passes away.

Non-vested

The non-vested bonus is the difference between the total bonus and the vested bonus. The non-vested bonus may be reduced or removed when the client alters the nature of the original contract, or as a result of poor investment returns.

The non-vested bonus is usually paid out in full if a death claim is made or when a claim is made at the end of the investment period. On partial or full surrender (when a client withdraws from or ends the investment before the investment period is over), the client will only get a portion of the non-vested bonus.

Notes

- Past performance cannot be used to estimate future values, and it is not necessarily an indication of future performance.
- The Final bonus rates and Interim bonus rates are annualised and shown net of fund management fees and any applicable tax on investment returns.
- Increases and decreases in the non-vested Interim bonus rate may occur over time as trends in the investment markets become clearer. However, Metropolitan remains committed to managing the fund responsibly to balance policyholder fairness, stability and growth over the long term.
- As at 1 May 2025, Metropolitan underwent a migration of the Smoothed Bonus portfolios (except Voluntary Group Retirement Savings) to a new administration system. To facilitate the migration of the Smoothed Bonus portfolios, final bonus rates were declared so that the new administration system captured the value of the investment account following the closure of the legacy systems at the end of April 2025.
- The 10-year and 15-year annualised bonus rates shown above include two-thirds of the relevant bonus rates declared in 2015 and 2010, respectively, for all portfolios except Voluntary Group Retirement Savings. Voluntary Group Retirement Savings includes half of the relevant bonus rate from each of those years. This approach ensures consistency in the calculation following the change in bonus rate declaration cycles from 31 December to 30 June, starting from 30 June 2017 when another half of the relevant bonus rate was declared, effectively changing from a calendar-year to a financial-year basis. It also takes into account the fact that the bonus declaration was done earlier, i.e., 10 months in the 2025 financial year, except for Voluntary Group Retirement Savings which had a declaration as at 30 June 2025.
- For FutureChoice Investment Option endowments and Retirement Annuities, the bonus rates are 1% higher for policies written before 2009 and 1.25% higher for policies written after 2009.
- The value of an investment may be reduced or increased depending on the value of the underlying assets upon surrender of a policy.
- Always contact your financial adviser for a complete analysis of your financial needs before making any investment decisions.

Metropolitan Life is part of Momentum Metropolitan Life Limited, a licensed life insurer and an authorised financial services (FSP44673) and registered credit provider (NCRCP173).
